Professional Summary

Fourth-year Computer and Communication Engineering student with a solid background in Java, C++, JavaScript, React.js for client-side development, ASP.NET, and Node.js for server-side development. Experienced in building end-to-end applications through academic and internship projects, with a focus on clean architecture, scalability, and real-world problem-solving.

Experience

Full-Stack Web Intern – Integrated Digital Systems (IDS)

Jun 2025 – Jul 2025

Worked collaboratively in a two-person development team on a Smart Room Manager system.

Designed the database architecture and created ER diagrams to model relationships and ensure data integrity.

Implemented backend API endpoints using ASP.NET Core to handle room management and authentication.

Ensured smooth integration with the React.js frontend through RESTful services.

Key Projects

Psychotherapist Session Management System

Built a system that manages the bookings of sessions of a psychotherapist with ASP.NET and applied MVC architecture.

Implemented Stripe payment, OpenAI chatbot as an assistant, and Zoom for online sessions as external APIs.

Perfumes Inventory (AI-Powered System)

Developed an intelligent inventory management system using AI-based image recognition and price prediction to automate product entry.

Built a FastAPI backend with deep learning and machine learning models, a React.js frontend for real-time inventory management, and MongoDB with GridFS for image storage.

Education

Bachelor of Engineering in Computer and Communications

(Master's level)

Software Engineering and Networks

2022 –present

Antonine University, Lebanon

Certifications & Professional Training

Software Engineering Excellence (SE²)

Completed a full professional software engineering curriculum focused on production-ready systems

Applied clean architecture, SOLID principles, and scalable backend design

Built end-to-end applications with TypeScript and Node.js following industry workflows

Practiced code reviews, GitHub workflows, testing strategies, and DevOps fundamentals

CCNA (Cisco Certified Network Associate).

Languages

English (Completed B2 level), Arabic.
