Experience

Software Engineering Intern, TechTalks – Remote Jun 2026 – Aug 2026

Contributing to the development of **Food Spot**, a production-style restaurant management and food ordering platform while collaborating within an Agile software engineering team.

- Developed RESTful backend APIs using **Next.js**, **TypeScript**, **Prisma**, and **PostgreSQL** following layered architecture principles.
- Designed and implemented scalable modules including Restaurants, Categories, Reservations, and Orders with validation, error handling, and repository-service architecture.
- Built automated unit tests using **Vitest** and collaborated through Git workflows, sprint planning, and code reviews.
- Participated in full-stack feature development while ensuring clean, maintainable, and production-ready code.

Tech & Tools: Next.js • TypeScript • Prisma ORM • PostgreSQL • Vitest • REST APIs • Git • GitHub

Full-Stack Web Intern, Integrated Digital Systems (IDS) – Lebanon, Beirut Jun 2025 – Jul 2025

Worked within a collaborative development team to build a Smart Room Manager system focusing on backend development, database design, and frontend integration.

- Designed relational database schemas and ER diagrams to ensure data integrity and scalable architecture.
- Developed backend REST APIs using **ASP.NET Core** for room management and authentication services.
- Integrated backend services with a React.js frontend while maintaining clean API contracts.

Tech & Tools: ASP.NET Core • C# • React.js • SQL Server • REST APIs • Git

Projects

PsyConnect – GitHub Link Oct 2025 - Dec 2025

- Architected a full-stack session management system utilizing **ASP.NET Core MVC and Clean Architecture**.
- Integrated **Stripe API**, **Zoom API**, and **SMTP servers** to deliver an automated end-to-end workflow for payments, secure video consultations, and appointment reminders.

Tech & Tools: ASP.NET Core MVC • OpenAI API • Stripe API • Zoom API • SMTP • .NET 9

Perfume Inventory – GitHub Link Nov 2025 - Dec 2025

- Developed a full-stack web application, AI-powered perfume inventory, utilizing **FastAPI and React.js**.
- Integrated **dual custom AI models** (EfficientNetB0 and Random Forest) into a low-latency FastAPI backend for real-time image classification and price prediction.

Tech & Tools: FastAPI • React.js • MongoDB • CNN • Random Forest Regression

Education

Antonine University, BE in Computer and Communications Engineering 2022 - 2027

- Software Engineering and Networks

Training & Certifications

Software Engineering Excellence (SE²) – Intensive Professional Curriculum 2026

- Applied **Clean Architecture**, **SOLID principles**, and patterns for building scalable, production-ready backend systems.
- Developed end-to-end applications using **TypeScript** and **Node.js**, adopting industry-standard workflows.
- Practiced engineering fundamentals including code reviews, testing, GitHub workflows, and DevOps essentials.
